Constituents	Bird control solutions for Bridges: Cable Frame Netting
Function	Bird protection for bridges make sure that birds cannot sit within or on abutments or pillar heads
Constituents	Knotted netting made of Polyethylene, nylon or other textiles or Stainless Steel nettings Fastening material (usually stainless steel cable, Ring clips, turnbuckles)
Material	Netting: Highly dense Polyethylen 12/6 HDPE, rotting resistant 6 Monothread 630 denier (single thread diameter 0.3mm), three double-twisted threads are twisted into one single thread
Colour	Black/gray/translucent
Mesh size	50mm x 50mm
Thread Thickness	1.0mm, breaking limit 14kg (ISO 1805)
Fire protection	Flame resistant according to DIN 4102 B1 Melting point ca. 130°C
UV characteristics	UV stabilised
Fastening	The netting is fastened with a stainless steel wire of 1.5mm diameter, which is hold by turnbuckles at the structure of the building. Ring clips are used to hold the netting and connect it to the wire.

Liability advise
 TONI-Products are long established and proven bird control products. However, TONI products can only work effectively as part of an overall and planned programme of bird control. This includes hygiene management and the use of professionally trained personnel. Without limitation, TONI Bird Control Solutions GmbH & Co. KG will not accept liability for any consequences as a result of poor equipment maintenance, misuse, inappropriate use, lack of operative training, failure of due diligence or through lack of prior project consultation. In some countries, the use of TONI products may require an official permit for building regulation or nature conservation. TONI will not accept liability for any consequences as a result of missing approvals.
