

BIRDKITE – Security Advise

Please read and obey all these Birdkite safety instructions:

1. Birdkites are not a toy and are not intended for use by children.
2. Read all instructions before use.
3. Obey all local, state, or federal laws related to flying kites in your area. The use of TONI products may require an official permit for building regulation or nature conservation. TONI will not accept liability for any consequences as a result if missing approvals.
4. If possible, never fly birdkites during electrical storms because it may conduct lightning down the line. If the Birdkite is up during an electrical storm, do not go near it until the storm has finished, it will probably survive.
5. Ensure no power lines, telephone wires, trees, obstructions, animals or people can come near the Birdkite anywhere it can possibly fly, keep birdkite well away from power lines as maintenance helicopters patrol these regularly. Do not fly near cropsprayers or any low-flying aircraft.
6. Do not fly within 5 km / 5 miles of any airfield without air traffic control permission.
7. Birdkites are dangerous for helicopters. Therefore do not use them anywhere near landing sites (i.e. closed to hospitals).
8. Do not fly over roads at any time.
9. Max. height allowed is 60 meters.
10. If you wish to make the line more noticeable, tie some ribbons along it.
11. Wear gloves when handling the line to avoid it cutting hands.
12. PLEASE NOTE: When wet, the disposable balloons may lose some colouring that can stain fabric.

Enjoy flying our Birdkites!
